

APPLICATION NOTE - CSS Mindshare Dispatch

[Click here for PDF version of this Application Note](#)

Solution Overview:

Eventide NexLog DX-Series recording solutions (and original NexLog recorders) provide archival and instant recall recording for the CSS Mindshare VoIP Dispatch System. IP audio streams are reliably captured, recorded, and archived. Recordings are instantly available for replay, research, incident reconstruction, burn to CD, and export. The same Eventide voice logger can also record VoIP, digital or analog telephones, trunked and conventional radio, and PC screen video.

Interface Details:

- Audio capture method: Recording of IP Multicast audio
- Audio format supported: G.711 (64kbps)
<check with Eventide regarding alternate audio formats>

Metadata Elements Captured:

- Channel name
- Radio ID/ANI
- Multicast source IP address
